

Vikta Heel Offload Boot

'effectively heal-the-heel'

A pre-inflated heel offload boot for the healing and prevention of pressure sores to the heel area.

- ✓ Effective
- ✓ Comfortable
- ✓ Easy to Clean
- ✓ Multi-patient Use

Air-flow design for circulation

Easy to clean in hospital environment

Easy tie-tapes for quick and secure fastening

Open heel offload for complete protection

Benefits

- ✓ Comfortable and lightweight to wear
- ✓ Totally offloads the heel, even when using a profiling bed knee brake
- ✓ Especially effective for users that move in the bed, as it stays attached providing constant relief
- ✓ Multi-person use (not single patient use)
- ✓ Helps prevent foot-drop and foot rotation
- ✓ Easy to clean in a hospital environment
- ✓ Fits most leg sizes
- ✓ Provides full leg support for side lying

Features

- ✓ Pre-inflated to a calibrated pressure for maximum comfort and support, whilst providing the offload for healing.
- ✓ Easy tie-tapes with a protective tongue to fasten the boot so that it stays securely on the users leg.
- ✓ Air-flow design for air ventilation around the leg
- ✓ Infection control compliant
- ✓ No valves, eliminating any pressure point risk and infection ingress risk
- ✓ Suitable for all healthcare environments
- ✓ Flexible, tactile, comfort material
